curl from wolfram mathworld - *the curl of a vector field denoted curl f or del xf the notation used in this work is defined as the vector field having magnitude equal to the maximum circulation at each point and to be oriented perpendicularly to this plane of circulation for each point more precisely the magnitude of del xf is the limiting value of circulation per unit area*, **html how to make a div 100 height of the browser window** - *all the other solutions including the top voted one with vh are sub optimal when compared to the flex model solution with the advent of the css flex model solving the 100 height problem becomes very very easy use height 100 display flex on the parent and flex 1 on the child elements they ll automatically take up all the available space in their container*, **css width equal to content stack overflow** - *the solution with inline block forces you to insert br after each element the solution with float forces you to wrap all elements with clearfix div another elegant solution is to use display table for elements with this solution you don t need to insert line breaks manually like with inline block you don t need a wrapper around your elements like with floats and you can center*, **electromagnetism maxwell s equations and their solutions** - *a presentation of maxwell s equations with a discussion of some of their solutions*, **gradient from wolfram mathworld** - *the term gradient has several meanings in mathematics the simplest is as a synonym for slope the more general gradient called simply the gradient in vector analysis is a vector operator denoted del and sometimes also called del or nabla it is most often applied to a real function of three variables f u 1 u 2 u 3 and may be denoted del f grad f*, **inhomogeneous electromagnetic wave equation wikipedia** - *in electromagnetism and applications an inhomogeneous electromagnetic wave equation or nonhomogeneous electromagnetic wave equation is one of a set of wave equations describing the propagation of electromagnetic waves generated by nonzero source charges and currents the source terms in the wave equations makes the partial differential equations inhomogeneous if the source terms are zero*, **electromagnetic dipoles magnetization and electric** - *2005 05 18 force exerted on a dipole by a nonuniform field a uniform fields exerts a torque but no net force the net force an electric field e exerts on an electric dipole p is f grad p e div e p in the similar expression for the force exerted on a magnetic dipole m the second term vanishes because b is divergence free*, **applied mathematics university of south africa** - *14 apm211v differential equations prerequisite any two of mat101 102 112 113 advice aspects of linear algebra as treated in mat103 is used in this module purpose to enable students to obtain knowledge of rst order ordinary di erential equations linear di erential equations of higher order series solutions of di erential equations method of frobenius laplace*, **math mathematics courses okanagan academic calendar** -
